

XYZTEC, incorporated in 2000, designs and manufactures innovative equipment that is used for quality assurance to ensure the reliability of many products in multiple industries. We set the standard in Statistical Process Control (SPC). We are 100% focused on bond testing and have established our name as technology leader in bond testing worldwide.

Customer satisfaction, high quality, innovation and superior support are our priorities. XYZTEC is market leader in Europe and is steadily growing in other major territories globally. Our equipment is primarily used in semiconductor, automotive and raw material industry. XYZTEC is committed to work with various research institutes and universities globally. Customers are happy with our personal no-nonsense approach and recognize our unique features. Aiming to improve understanding of bond testing in the industry, XYZTEC organizes

seminars to present and disseminate knowledge in a straightforward format. Every seminar is focused around a particular aspect of the science of bond testing. Our extensive network of both distributors and regional representatives offers excellent support both locally and internationally. As member of the Simac group, XYZTEC provides financial stability and access to resources that are common to larger companies. Our production process is ISO 9001, ISO 13485 and ISO 14001 certified. To provide you with outstanding quality, all of our production is implemented in the Eindhoven region of The Netherlands, a European center of excellence for High Tech. Our goal is 100% customer satisfaction, being flexible and reliable to ensure long-term relationships with our customers. XYZTEC's products are characterized by low cost of ownership and sensible pricing for service and spares.
